**Notes:**

<sup>1</sup> Prices are the same for soils and waters.

<sup>2</sup> "Total Price for 12 Samples" has been adjusted to include billable QA/QC samples at a frequency of one set of QA/QC samples per 20 samples of similar sample matrix. The average CLP data package consists of 12 samples. The Low Concentration Organic sample prices were not adjusted to include billable QA/QC since they are only analyzed if requested by EPA. Billable QA/QC Samples include:

Inorganics - Matrix Spike, Duplicate, and Laboratory Control Sample

Organics - Matrix Spike and Matrix Spike Duplicate

<sup>3</sup> Preliminary Results:

Inorganics - Preliminary Results available with 7, 14, or 21-Day Turnaround. Price listed is in addition to the 7, 14, or 21-Day Inorganic Analysis Price. All Inorganic Preliminary Results will be 72 hours.

Organics & Low Concentration Organics - Preliminary Results available with 7, 14, or 21-Day Turnaround. Price listed is in addition to the 7, 14, or 21-Day Low Concentration Organic Analysis Price.

Volatiles - 48 hours

Semivolatiles - 72 hours

Pesticides/PCBs - 72 hours
